Rationality in Economics

14220017

goals of instruction

The course deals with rationality in economics. Full rationality is based on the foundations of economic theory. Rationality is bounded and constrained. The course deals with concepts of constructive and ecological rationality, in perspectives that reach new and innovative fields within economics. The course is based on reading texts and discussions in the classroom. Attendance in classes is mandatory.

Chapters included:

1. What is rationality?
2. The model of rationality.
3. Rationality of people.
4. Understanding the rates.
5. Interpreting the model of rationality.
7. Shaping the model.
8. Rationality of a society.
9. The model of society.

Grading:

A comprehensive final exam accounts for 50% of the grade, active participation accounts for 50% of the grade.
