

Department of Chemistry

Dr. Lilia Gurevich Vasilkovsky Memorial Seminar

Monday, April 27th, 2026

Time: 14:00

Bldg. 43 Room 015

Lilia Gurevich Vasilkovsky was taken prematurely in the middle of a music festival near Kibbutz Re'im, on the "Black Sabbath" of October 7, 2023.

Lilia was a devoted mother to twins who were then 6.5 years old. She left her parents, two brothers, and many family members and friends who love her and miss her.

Lilia received her doctorate from the Department of Chemistry under the supervision of Prof. Gonen Ashkenasy in July 2022.

Lilia was the director of the molecular biology department at Amai Proteins, where she developed a new strain of protein that is 1000 times sweeter than regular sugar and would replace currently used sugar substitutes.

1985-2023

14:00 – Gathering and light refreshments

14:30 – Guest speaker – Prof. Addy Pross

A New Physical Basis for Life, Mind, and Evolution

The award in the name of Lilia, for an outstanding doctorate student, will be presented by the family
